DATA-DRIVEN SOLUTIONS DRIVING PROFITABILITY AND UPTIME

OnCommand® Connection is an industry-leading remote diagnostics solution that's built for how you do business. It supports all commercial truck makes and models,* and transforms vehicle data into critical insights that help drive greater uptime and reduce total cost of ownership.

Features Include:

- Vehicle fault code reporting and severity ratings
- Comprehensive vehicle health reports
- Interactive fault code action plans that identify most likely needed parts and service
- GPS mapping with nearby service centers, hotels, and more
- Available Fleet Health Monitoring

OnCommand Connection customers have seen up to 30% reductions in unplanned repair costs and up to 80% reductions in vehicle failures requiring a tow.

SOFTWARE SOLUTIONS

Service	Description
OnCommand Connection Portal	Advanced Remote Diagnostics and mapping for all makes and models*; available at no charge for any vehicle equipped with OCC telematics or one of 28+ integrated telematics service providers.
Fleet Health Monitoring (Premium Subscription Required)	Weekly reports of vehicles encountering significant health issues that put them at risk of de-rates or breakdowns. Ask your International Truck dealer for details.
Advanced Preventive Maintenance (Premium Subscription Required)	Designed to maximize the efficiency of your PM spending by recommending custom PM intervals for each vehicle based on engine data such as odometer and idle time. Ask your International Truck dealer for details.

For more information, support, or training, email OCCOperations@Navistar.com

*For most commercial vehicles powered by diesel engines, 2007 MY and later.
