

INTERNATIONAL® 4000 SERIES TRUCKS. BUILT WITH YOUR BUSINESS IN MIND.

GIVING CUSTOMERS EVERYWHERE THE GIFT OF PAYBACK.

Hailed as the industry's leading medium duty truck, the International® 4000 Series is ideal for your Dry Van and Reefer applications. A lighter and stronger frame rail system handles the heaviest loads. While an up to 50-degree wheel cut lets you maneuver through city streets with ease. Step inside and watch instrument gauges perform a self-diagnostic sweep, putting your mind at ease before you even leave the lot. But the comfort perks don't stop there. The spacious cab hushes the outside noise and engine vibrations. And a best-in-class HVAC system and window vents keep the perfect temperature and air circulation on the inside, whether it's the dog days of summer or a frigid winter night on the outside. So project a bold and distinct image for your company by leasing an International 4000 Series truck. It's the medium duty truck that leads the industry in cost efficiency, safety, and ease of operation. And it's available at Idealease.

A roomy cab keeps you comfortable, while optional cloth seats protect from everyday wear and tear.

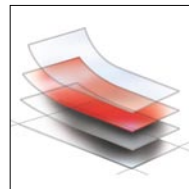

Make yourself at home by placing your personal items within easy reach in the spacious overhead console.

Easy-to-read gauges let you monitor your vehicle with a glance, so you can keep your eyes on the road.

Operating an International vehicle is a breeze with simple controls and switches that are easy to see and reach.

Three coats of paint keep your vehicle looking good and protect against those unnecessary damages from scratches.

A three-point entry and offset steps get you on and off in no time, even after those 12-hour days.
